DETAILED ACTION

This is the first Office action on the merits of Application No. 10/723,555 filed on November 24, 2003. Claims 1-13 are currently pending.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "prime mover" and "gearbox" recited in claims 11-13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7, 8, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagano et al. '008. Note Figure 6 which shows the torque transmission system for transmitting torque between prime mover 1 and gearbox 54. The torque transmission system of Nagano et al. includes the input shaft 5, output shaft 66, first clutch C2, and the drive arrangement including the first drive wheel 6, second drive wheel 7 and endless belt 14.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hata et al. '691. Note particularly Figures 11 and 12 which show the torque transmission system for transmitting torque between prime mover 900 and gearbox J. The torque

transmission system of Hata et al. includes the input shaft 409, output shaft 405, first clutch 471, and the drive arrangement including the first drive wheel 426, second drive wheel 477 and endless belt 478. Hata et al. further shows the electric machine 404 with rotor 454 and stator 453. Also note the actuating system 474 of the clutch.

Prior Art Citation

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner further cites Petzold '512, Masut '634, Suzuki '027, Ooyama '764 and Honda et al. '937 (JP) each of which disclose torque transmission systems including an input shaft, a laterally offset output shaft, a clutch and an endless belt.
